

## **New Undesignated Caution Sign Approved**

1. Benbrook Lake in Fort Worth District requested approval of a new safety sign to warn people of the potential hazard presented by radio-controlled aircraft being flown near developed recreation areas at their lake. The request was reviewed by the Sign Advisory Workgroup, appropriate offices in HQ USACE and the National Sign Program MCX. The following wording is approved:

2. This sign is used adjacent to fields on Corps of Engineers property where radio-controlled aircraft are permitted.
3. Letter size (“A”) will be determined by the viewing distance. See page 2.6 of EP 310-1-6a, Sign Standards Manual for guidance in determining “A.” Letter size will determine the dimensions of the panel. The proportions are 17A x 10.5A
4. For more information about this approved sign, or other sign questions, please contact your district or division sign manager.
